Sergio Fernandez is one of Spain's hottest exports right now. Since his first album 'Mob Rule' on baroque, in 2008, his status as one of the scenes most consistent Tech House producers has been confirmed, with his singles gracing top 10 charts at even reaching number 1 spots the likes of Beatport & Dj Download, with releases on the likes of Spinnin & Baroque.. remixes for Armada & Beatfreak.. and the launch of his very own imprint â Insert Coin. All alongside his hectic worldwide DJ Schedule. Now, after months of beavering away in his studio, we are both excited and proud to present his second artist album.

Angel & Demon reflects the two sides of Sergio, in full frequency audio! Tuff techy tribal grooves give this album its backbone. With tracks like 'Laser', 'Yellow' & 'On Fire' providing an almost funky edge. Tracks like 'Cyborg', 'Skipper' & 'Yellow' give the album its smooth deep quality, and the full on tribal tech anthems such as 'Africa Rules' & 'Lion' give the album its fiery spark.

Two bonus remixes are also include.. a relentless remix from Dj Remy for 'On Fire' is the best work we have heard from the man, and the techno man of the moment Alex Young works his magic around 'Africa Rules.. what more could you ask for in a long player!
