The german cult-electronic-band Welle:Erdball done a lot of things in the last 16 years. in the first line music and records of course, but beside of this they released also a comic-book, a cinema-movie (in march 2010) and now this radio play as a 2 cd-box-set. Welle:Erdball are self big fans of radio plays and so they produced in 2006 a episode of "the adventures of commender lasterstrahl", which becomes (not planed) a big success. Than follows more episodes and in the end there was a cd with all from season 1. this album is sold out since a long time but there are still people asking for this cd-album.

Meanwhile Welle:Erdball produce a season 2 and here is the end of the story: the 2 cd-box-set with all episodes. Please note: NOT FOR CHILDREN! but full of the typical kind of zynism and sarkasm and this kind of punky-electro-feeling you know from Welle:Erdball... The story: commander laserstrahl from planet xeronia and the boarcomputer of his starship meets humans on earth and want to become a contact. but it's not so easy as it seems... In this 2 cd-box-set you find all episodes from season 1 and seaon 2. the radio play features also a bonus-section (cd-rom-track with outtakes ad a live-episode made by fas), a sticker and a comic in the booklet. Total time of playing around 150 minutes.
