The project C-Drone-Defect, which has been existing for more than 10 years, has become the insiders tip of the German Electro-scene. Both of the previous CDs, "Neural Disorder Syndrome" (SPV) and "Nemesis" (NoiTekk) were really successful - but compared to the new album "Dystopia" they appear to be more like rough diamonds. "Dystopia" manages it to raise the bar in terms of songwriting and sound composing that hardly any other project can compare to it. The free Net-EP "Letters from Dystopia" was the famous rumours for glory - the longplayer "Dystopia" met all of the high expectations. Driving rhythms, catchy keyboard soundscapes and a perfectly arranged voice mixed up with some great new ideas and creativity created one of the most incredible Electro-albums of 2010. Threatening - dark - gloomy - hymnal! That's it! Test it! The first limited edition of 1000 copies comes up with an exclusive bonus CD!
